FLC Updates

- What would make the Digest better? Take three minutes to [share your opinions](#).
- Join FLC, AUTM and USPTO on May 17 at the [Green Energy Innovation Expo](#) in Alexandria, VA.
- Discover the advantages of [Standard IP Licensing Agreements](#) in our May 25 webinar at noon ET.
- Connect with us June 6-7 in Mystic, CT, for a special in-person event: [The FLC Northeast Region: Seizing the Future](#).
- Take the online course, [Introduction to Patents](#), any time, anywhere!

Labs in Action

[Conductive Filament from NSWC Crane Expands Options for Desktop 3D Printers](#)

Users of desktop 3D printers—the most common and least expensive kind—can more easily create electronic devices thanks to technology developed by Navy researchers and licensed by a veteran-owned small business. The all-metal copper filament technology was licensed by veteran Ian Ramsdell, who started a company named Kupro to commercialize it for military, industrial and medical uses.

FLC DIGEST

FLC Photo of the Week

The National Cancer Institute (NCI) has one of the largest and most diverse collections of organisms for natural product-based research. New natural products were isolated and investigated as potential anti-cancer agents from the pictured sea squirt, a Clavelina species.

The Photo of the Week visually showcases the exciting work federal labs do every day!

Federal T2 at Work

[Helmet Tech from DHS S&T and TTU Takes Firefighter Safety to New Levels](#)

No single helmet design provides everything a firefighter needs—thermal and ballistic protection, compatibility with communications devices and other accessories, and lightweight materials that don't stress the neck and spine. Now the Department of Homeland Security Science and Technology Directorate is partnering with Texas Tech University to develop a helmet that has it all.

[DEFENSEWERX Partners with Landus to Launch Agriculture Innovation Hub](#)

DEFENSEWERX, an FLC Partner, and Landus, Iowa's largest farmer-owned cooperative, have announced the launch of LANDWERX, a first-of-its-kind agriculture innovation hub. The new hub will give farmers access to the DEFENSEWERX ecosystem and nontraditional collaborators to more rapidly address the biggest on-farm challenges.
