FLC Updates

- **Today!** Don't miss the [Provisional Patent Decisions](#) webinar with Gail Poulos and David Zimmerman at noon ET.
- **Three weeks left!** Submit your lab's photos for the 2024 [FLC Planner](#) by August 1. All submissions are eligible to be a Digest Photo of the Week!
- Help us kick off the new Meet the Labs series on July 26 with an overview of the [NIST Engineering Laboratory](#).
- If ag is your bag, register now for the [FLC-AUTM Animal Health Partnering Forum](#), August 29-30 in Kansas City, Missouri.

FLC Digest Wins Silver in Marketing Competition

The FLC won a EXCEL Silver award in June from AM&P, an association media organization, for the redesign of this Digest that was implemented last fall. The FLC has now won EXCEL awards in consecutive years; the Planner won a gold award in 2022.

EPA Tech Developed to Remove Ammonia from Drinking Water Also Has Green Energy Potential

A technology marketed as NoMonia, which was designed and patented by the Environmental Protection Agency (EPA) to remove ammonia and other contaminants from drinking water, is now also positioned to play a key role in producing green energy. AdEdge, the first company to license the technology, was acquired for \$40 million by clean energy company Chart

Industries, in part because of water purification's importance for producing hydrogen power.

[National Security Agency: Building Materials at the Atomic Level](#)

Experts at the National Security Agency (NSA) are working to build materials for use in atomic devices. In addition to using necessary materials that already exist, researchers are able to physically stack atomic layers to create materials by design.

The Photo of the Week visually showcases the exciting work federal labs do every day!
